Correction for 'Investigation of a flexible, room-temperature fiber-shaped NH<sub>3</sub> sensor based on PANI-Au-SnO<sub>2</sub>' by Qiuning Wang et al., RSC Adv., 2024, 14, 38530-38538, https://doi.org/10.1039/D4RA06915C.

The authors regret that there was an error in the sentence on lines 10–11 of the left column on page 38535, in the second paragraph of section 3.4. The text originally read: 'The responses to CO, H<sub>2</sub>S, NO<sub>2</sub>, NH<sub>3</sub>, SO<sub>2</sub>, and H<sub>2</sub> equaled 1.04, 1.05, 1.00, 1.12, 0.10, and 0.20, respectively.' This sentence should read: 'The responses to H2, NH3, CO, and SO2 equaled 0.20, 1.12, 0, and 0.10, respectively.' A higher resolution version of Fig. 7 has also been included.

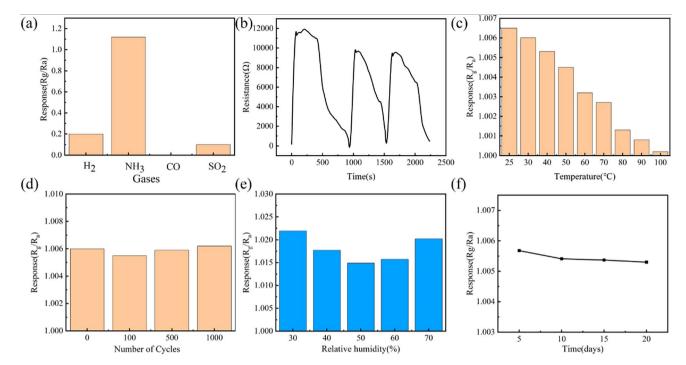

Fig. 7 (a) Response of fiber-shaped sensor towards different interference gases with a concentration of 40 ppm. (b) Cycling response toward 40 ppm NH<sub>3</sub> at room temperature. (c) Response value of the NH<sub>3</sub> sensor at different operating temperatures. (d) Response changes of NH<sub>3</sub> sensors after different bending cycles. (e) Response values of the NH3 sensor at different relative humidities. (f) Temporal stability of the NH3 sensors.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
