Correction: Palladium catalyzed amide-oxazoline directed C–H acetoxylation of arenes

Bin Liu, Xuhu Huang, Xin Wang, Zemei Ge* and Runtao Li*

Correction for 'Palladium catalyzed amide-oxazoline directed C–H acetoxylation of arenes' by Bin Liu *et al.*, *Org. Chem. Front.*, 2015, DOI: 10.1039/c5qo00104h.

In 2013, Zhang and co-workers developed the Pd-catalyzed oxidative acetoxylation of benzylic C(sp³)-H bonds of picolinoyl-protected toluidines using PhI(OAc)₂ as an oxidant.¹ In our article, we regret the inclusion of an incorrect structure in Scheme 1, page 1 of the original manuscript. The correct structures are given below.

Scheme 1 Transition metal-catalyzed acetoxylation of C–H bonds.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
