Correction for 'Dipolar vinyl sulfur fluorescent dyes. Synthesis and photophysics of sulfide, sulfoxide and sulfone based D- $\pi$ -A compounds' by Matias Monçalves *et al.*, *RSC Adv.*, 2017, 7, 8832–8842.

The authors regret that Table 2 was incorrectly formatted in the original manuscript showing two solvent columns. The correct table, with only one solvent column is presented below.

**Table 2** Relevant photophysical data of the fluorescence spectra, where  $\lambda_{em}$  is the emission maxima (nm),  $\Delta\lambda_{ST}$  is the Stokes' shift (nm  $cm^{-1}$ ),  $\Delta\lambda_{em}$  is the solvatochromism in the excited state (nm  $cm^{-1}$ ) and  $\Phi_{FL}$  is the fluorescence quantum yield (%)
