Correction for 'O<sup>2</sup>-3-Aminopropyl diazeniumdiolates suppress the progression of highly metastatic triple-negative breast cancer by inhibition of microvesicle formation *via* nitric oxide-based epigenetic regulation' by Fenghua Kang *et al.*, *Chem. Sci.*, 2018, **9**, 6893–6898.

The authors regret that in the original article two incorrect images were used in Fig. 4b for representing migration tumor cells in the control and TGF- $\beta$  + **3f** (20 nM) groups, and two incorrect images were used in Fig. 4c for representing invasive tumor cells in the TGF- $\beta$  + **3f** (10 nM) and TGF- $\beta$  + **3f** (20 nM) groups.

**Fig. 4** (a) 3f inhibited adhesion of MDA-MB-231 cells to HUVECs: fluorescence microscopy showed MDA-MB-231 cells (green) adhered to the HUVECs.  $^{**}P < 0.01$ . (b) 3f inhibited migration of MDA-MB-231 cells. (c) 3f inhibited invasion of MDA-MB-231 cells. (d) 3f inhibited lateral migration of MDA-MB-231 cells. Data are shown as mean  $\pm$  SD from each group. Scale bars, 100  $\mu$ m.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
