Correction: Nanoarchitectonics of p-type BiSbTe with improved figure of merit *via* introducing PbTe nanoparticles

Yuanyue Li, Mengna Ren, Zhongsen Sun* and Zhao Yao*

DOI: 10.1039/d1ra90170bCorrection for 'Nanoarchitectonics of p-type BiSbTe with improved figure of merit via introducing PbTersc.li/rsc-advancesnanoparticles' by Yuanyue Li et al., RSC Adv., 2021, 11, 36636–36643, DOI: 10.1039/D1RA07138F.

The authors regret that affiliation a was incorrectly given in the original article. The correct affiliation is shown here.

In the sentence beginning "For instance, PF of the sample with $\chi = 0.5$ wt% is 33.8..." incorrect units were given. The corrected sentence is as follows: For instance, PF of the sample with $\chi = 0.5$ wt% is 33.8 μ W cm⁻¹ K⁻² at 482 K, which is ~33% larger than that of the BST matrix (25.5 μ W cm⁻¹ K⁻²).

In the sentence beginning "For instance, as to the sample with $\chi = 0.5$ wt%, κ decreases from 1.10..." incorrect units were given. The corrected sentence is as follows: For instance, as to the sample with $\chi = 0.5$ wt%, κ decreases from 1.10 to 0.99 W m⁻¹ K⁻¹ at 482 K (a ~10% decline).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
