## Correction: Characterizing the ligand-binding affinity toward SARS-CoV-2 Mpro via physics- and knowledge-based approaches

 Son Tung Ngo,<sup>\*ab</sup> Trung Hai Nguyen,<sup>ab</sup> Nguyen Thanh Tung,<sup>cd</sup> Van V. Vue,<sup>e</sup> Minh Quan Pham<sup>\*df</sup> and Binh Khanh Mai<sup>g</sup>

DOI: 10.1039/d2cp90233h

 Correction for 'Characterizing the ligand-binding affinity toward SARS-CoV-2 Mpro via physics- and knowledge-based approaches' by Son Tung Ngo et al., *Phys. Chem. Chem. Phys.*, 2022, <https://doi.org/10.1039/d2cp04476e>.

rsc.li/pccp

The authors would like to make a correction to Fig. 8 in the published version of the article. The corrected figure is shown below.

**Fig. 8** Schematic illustration of the calculation of the binding free energy between SARS-CoV-2 Mpro and a ligand via the FEP approach.<sup>115</sup> (A) The full-interaction state of a ligand with Mpro and solvation. (B) The noninteraction state of a ligand with Mpro and solvation. (C) The full-interaction state of a ligand with solvation. (D) The noninteraction state of a ligand with solvation. The solvent is not shown for clarity.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
