

Environmental Science: Atmospheres

rsc.li/esatmospheres

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

IN THIS ISSUE

ISSN 2634-3606 CODEN ESANC9 3(5) 775–956 (2023)

Cover

CRITICAL REVIEW

782

Marine aerosol feedback on biogeochemical cycles and the climate in the Anthropocene: lessons learned from the Pacific Ocean

Akinori Ito,* Yuzo Miyazaki, Fumikazu Taketani, Yoko Iwamoto and Yugo Kanaya

PAPERS

799

Heterogeneous chemistry of methyl ethyl ketone on mineral oxide surfaces: impacts of relative humidity and nitrogen dioxide on product formation

Eshani Hettiarachchi and Vicki H. Grassian*

Executive Editor

Emma Eley

Editorial Production Manager

Sarah Whitbread

Deputy Editor

Jon Ferrier

Assistant Editors

Jamie Purcell, Aphra Murray, Alexander John, Emily Ellison, Jack Pitchers

Editorial Assistant

Alex Holiday

Publishing Assistant

Lee Colwill

Publisher

Neil Hammond

For queries about submitted papers, please contact Sarah Whitbread, Editorial Production Manager in the first instance. E-mail: esatmospheres@rsc.org

For pre-submission queries please contact

Emma Eley, Managing Editor.

Environmental Science: Atmospheres

Interdisciplinary open access journal advancing the understanding of atmospheric science and related challenges.

rsc.li/esatmospheres

Led by Neil Donahue (Carnegie Mellon University), *Environmental Science: Atmospheres* is a gold open access journal committed to bringing the wider environmental science and climate change communities together in a fresh, open approach.

Editorial Board

Editor-in-Chief

Neil Donahue, Carnegie Mellon University, USA

Associate Editors

Claudia Mohr, Paul Scherrer Institute, Switzerland
Nonne Prisle, University of Oulu, Finland

Lin Wang, Fudan University, China
Stephen Klippenstein, Argonne National Laboratory, USA

Tzung-May Fu, Southern University of Science and Technology, China

Members

Joel Thornton, University of Washington, USA

Dwayne Heard, University of Leeds, UK

Advisory Board

Katye Altieri, University of Cape Town, South Africa

Federico Bianchi, University of Helsinki, Finland

Muhammad Bilal, Nanjing University of Information Science & Technology, China
William Bloss, University of Birmingham, UK

Ann Marie Carlton, University of California Irvine, USA

Peter DeCarlo, Johns Hopkins University, USA

Aijun Ding, Nanjing University, China
Delphine Farmer, Colorado State University, USA

Barbara Finlayson-Pitts, University of California, Irvine, USA
Christian George, CNRS, University Claude Bernard Lyon 1, France

Marianne Glasius, Aarhus University, Denmark
Mattias Hallquist, University of Gothenburg, Sweden

Thomas Hanisco, NASA Goddard Space Flight Center, USA

Lucy Hutyra, Boston University, USA
Maria Kanakidou, University of Crete, Greece

Prashant Kumar, University of Surrey, UK
Tuhin Kumar Mandal, National Physical Laboratory, India

Linsey Marr, Virginia Tech, USA
Randall Martin, Washington University in St Louis, USA

Ottmar Möhler, Karlsruhe Institute of Technology, Germany

Yujing Mu, Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, China

Patricia K. Quinn, National Oceanic and Atmospheric Administration, Pacific Marine Environment Laboratory, USA

Andrew Rickard, University of York, UK

Ilona Riipinen, Stockholm University, Sweden

Alfonso Saiz-Lopez, CSIC, Spain
Sachchida Nand Tripathi, Indian Institute of Technology, Kanpur, India

Ying I. Tsai, Chia Nan University of Pharmacy and Science, Taiwan

Marina Vance, University of Colorado Boulder, USA

Hanna Vehkamäki, University of Helsinki, Finland

Bingbing Wang, Xiamen University, China
Shuxiao Wang, Tsinghua University, China

Information for Authors

Full details on how to submit material for publication in Environmental Science: Atmospheres are given in the Instructions for Authors (available from <http://www.rsc.org/authors>).

Submissions should be made via the journal's homepage:

rsc.li/esatmospheres

Authors may reproduce/republish portions of their published contribution without seeking permission from the Royal Society of Chemistry, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)-Reproduced by permission of the Royal Society of Chemistry.

Registered charity number: 207890

816

Aqueous-phase photochemical oxidation of water-soluble brown carbon aerosols arising from solid biomass fuel burning

Vikram Choudhary, Max Loebel Roson, Xinyang Guo, Tania Gautam, Tarun Gupta* and Ran Zhao*

830

Evaluation of low-cost gas sensors to quantify intra-urban variability of atmospheric pollutants

Arunik Baruah,* Ohad Zivan, Alessandro Bigi and Grazia Ghermandi

842

Estimation of hourly black carbon aerosol concentrations from glass fiber filter tapes using image reflectance-based method

Abhishek Anand, Suryaprakash Kompalli, Eniola Ajiboye and Albert A. Presto*

855

A computer-based solution to the oxidation kinetics of fluorinated and oxygenated volatile organic compounds

Luís P. Viegas* and Frank Jensen

872

Kinetics and products study of the reaction of Cl atoms with methyl dichloroacetate: reactivity, mechanism, and environmental implications

Vianni G. Straccia C, Cynthia B. Rivela, María B. Blanco and Mariano A. Teruel*

882

Accretion product formation in the self-reaction of ethene-derived hydroxy peroxy radicals

Sara E. Murphy,* John D. Crouse, Kristian H. Møller, Samir P. Rezgui, Nicholas J. Hafeman, James Park, Henrik G. Kjaergaard, Brian M. Stoltz and Paul O. Wennberg*

894

In situ drift correction for a low-cost NO₂ sensor network

Jason A. Miech, Levi Stanton, Meiling Gao, Paolo Micalizzi, Joshua Uebelherr, Pierre Herckes and Matthew P. Fraser*

905

Trends in atmospheric pollution in the Third Pole: analyses of tropospheric NO₂ for the period 2005–2020

B. R. Sharma, J. Kuttippurath,* G. S. Gopikrishnan and M. Pathak

919

Highly local sources and large spatial variations in $\text{PM}_{2.5}$ across a city: evidence from a city-wide sensor network in Cork, Ireland

Rósín Byrne, Kevin Ryan, Dean S. Venables, John C. Wenger and Stig Hellebust*

931

Single-particle measurements and estimations of activity coefficients for semi-volatile organic compounds in organic aerosol of known chemical speciation

Thomas G. Hilditch, Daniel A. Hardy, Natasha J. Stevens, Peter B. Glover and Jonathan P. Reid*

942

Impact of COVID-19 lockdown on particulate matter oxidative potential at urban background versus traffic sites

Lucille Joanna S. Borlaza, Vy Dinh Ngoc Thuy, Stuart Grange, Stéphane Socquet, Emmanuel Moussu, Gladys Mary, Olivier Favez, Christoph Hueglin, Jean-Luc Jaffrezo and Gaëlle Uzu*
