Correction for 'Impact of thermal gas treatment on the surface modification of Li-rich Mn-based cathode materials for Li-ion batteries' by Maximilian Mellin et al., *Mater. Adv.*, 2023, **4**, 3746–3758, <https://doi.org/10.1039/D3MA00236E>.

The authors regret that in the section titled “Evolution of Ni oxidation and spin states upon treatment of HE-NCM”, the electronic configuration of Ni²⁺ is given incorrectly. The correct electronic configuration of Ni²⁺ is the following: Ni²⁺ (t_{2g}³↑ t_{2g}³↓ e_g²↑).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
