Evaluating Neutral PFAS for Potential Dermal Absorption from the Gas Phase

Per- and polyfluoroalkyl substances (PFAS) in consumer products: Current knowledge and research gaps

Synthesis Report on Understanding Side-Chain Fluorinated Polymers and Their Life Cycle

A global atmospheric chemistry model for the fate and transport of PFCAs and their precursors†

Degradation of Fluorotelomer Alcohols: A Likely Atmospheric Source of Perfluorinated Carboxylic Acids

Detection of fluorotelomer alcohols in indoor environments and their relevance for human exposure

Degradation of Fluorotelomer-Based Polymers Contributes to the Global Occurrence of Fluorotelomer Alcohol and Perfluoroalkyl Carboxylates: A Combined Dynamic Substance Flow and Environmental Fate Modeling Analysis

Fate of Per- and Polyfluoroalkyl Substances from Durable Water-Repellent Clothing during Use

Quantitation of Gas-Phase Perfluoroalkyl Surfactants and Fluorotelomer Alcohols Released from Nonstick Cookware and Microwave Popcorn Bags

Release of Side-Chain Fluorinated Polymer-Containing Microplastic Fibers from Functional Textiles During Washing and First Estimates of Perfluoroalkyl Acid Emissions

Semivolatile Fluorinated Organic Compounds in Asian and Western U.S. Air Masses

Fluorotelomer Alcohol Biodegradation Yields Poly- and Perfluorinated Acids

Wastewater Treatment Plant and Landfills as Sources of Polyfluoroalkyl Compounds to the Atmosphere‡

Simultaneous determination of perfluoroalkyl iodides, perfluoroalkane sulfonamides, fluorotelomer alcohols, fluorotelomer iodides and fluorotelomer acrylates and methacrylates in water and sediments using solid-phase microextraction-gas chromatography/mass spectrometry

Hydrolysis of FTOH precursors: a simple method to account for some of the unknown PFAS

A global atmospheric chemistry model for the fate and transport of PFCAs and their precursors†

Per- and polyfluoroalkyl substances in the environment

Neutral polyfluoroalkyl substances in the global Atmosphere

Significant Residual Fluorinated Alcohols Present in Various Fluorinated Materials

Low temperature thermal treatment of gas-phase fluorotelomer alcohols by calcium oxide

Closing the Mass Balance on Fluorine on Papers and Textiles

Emissions of Per- and Polyfluoroalkyl Substances in a Textile Manufacturing Plant in China and Their Relevance for Workers' Exposure

Formation of PFOA from 8:2 FTOH in closed-bottle experiments with brackish water

Measurement of fluorotelomer alcohols based on solid phase microextraction followed by gas chromatography-mass spectrometry and its application in solid waste study

Modeling the environmental fate of perfluoroalkyl alcohols and their precursors from global fluorotelomer acrylate polymer use

Prevalence and Implications of Per- and Polyfluoroalkyl Substances (PFAS) in Settled Dust

ISSN 2754-7000

PERSPECTIVE

Ivan A. Titaley

Chemical transformation, exposure assessment, and policy implications of fluorotelomer alcohol partitioning from consumer products to the indoor and outdoor environment—from production to end-of-life
