Correction for 'Fluorinated aromatic PCBTF and 6:2 diPAP in bridge and traffic paints' by Mitchell L. Kim-Fu et al., *Environ. Sci.: Processes Impacts*, 2024, <https://doi.org/10.1039/D4EM00546E>.

rsc.li/espi

The authors regret that there was an error in the title of the manuscript and in the 'Chemicals and solvents' section when referring to 'PCBTF'.

The corrected title and 'Chemicals and solvents' section are shown below:

Title: Fluorinated aromatic PCBTF and 6:2 diPAP in bridge and traffic paints

Chemicals and solvents

Solvents, PFAS standards of 11 target volatile PFAS [FTOHs, secondary FTOHs, perfluoroalkane sulfonamides (FASAs), and perfluoroalkane sulfonamido ethanols (FOSEs)], 55 target ionic PFAS [PFCAs, PFSAs, FASAs, perfluoroalkane sulfonamido acetic acids (FASAAs), substituted FASAs and FASAAs, fluorotelomer sulfonates, fluorotelomer carboxylic acids, diPAPs, chlorinated perfluoroalkyl ether sulfonates, perfluoroalkyl ether carboxylic acids, and cationic/zwitterionic PFAS], PCBTF (ThermoScientific, Waltham, MA), isotopically labeled extracted (surrogate) internal standards (Wellington, Guelph, ON), nonextracted internal standards, and reference fluoropolymers [PTFE, PCTFE, and Viton A] are listed in the ESI.†

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
