Correction for 'Mild decarboxylation of neat muconic acid to levulinic acid: a combined experimental and computational mechanistic study' by Siddhant Bhardwaj *et al.*, *RSC Adv.*, 2024, 14, 39408–39417, <https://doi.org/10.1039/D4RA05226A>.

The authors regret the omission of a reference from the original manuscript, which should have been included in addition to ref. 35–41 in the sentence below. This reference is shown below as ref. 1.

“MA serves as a key platform chemical that readily affords a plethora of critical commodity chemicals, including adipic acid, terephthalic acid,  $\epsilon$ -caprolactam, and 1,6-hexamethylene diamine, and novel monomers like cyclohex-1-ene-dicarboxylic acid (CH1DA).<sup>35–41</sup>”

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
